CATALOGUE RANGE

Sophisticated and versatile, the Catalogue Range of DecoSplash® Aluminium splashbacks create the perfect feature for your home. Choose from a variety of designs and images.

DecoSplash® Catalogue Range is available in the following splashback sizes:

600 series
600mm high x 1800mm wide
600mm high x 2400mm wide
600mm high x 3000mm wide
600mm high x 3600mm wide

750 series
750mm high x 1800mm wide
750mm high x 2400mm wide
750mm high x 3000mm wide
750mm high x 3600mm wide

1200 series - Full sheet
1200mm high x 2400mm wide
1200mm high x 3000mm wide
1200mm high x 3600mm wide

1500 series - Full sheet
1500mm high x 3000mm wide
1500mm high x 3600mm wide

In this range, there are 8 collections to choose from:
Essentials Collection
Mereton Collection
Roccia Collection
Mosaics Collection
Elements Collection
Metallic Collection
Timber Collection
Culture Collection

Most images featured in the Catalogue Range are representative of the 750mm high x 3,600mm wide scale.

DecoSplash® BATHROOMS

DecoSplash® is ideal for bathrooms and wet area linings because it is an impermeable membrane, and is a non-porous surface. It is easy to clean and is unaffected by soap residue. As with DecoSplash® for a kitchen, you can have almost any image you like for your bathroom. Be creative.

- Bathroom splashbacks can be made over multiple panels, you are not limited to just one sheet with the image, we can enlarge the image to suit.
- The vertical orientation of the Bathroom Collection images can be formatted to horizontal orientation for applications such as a matching vanity splashback.
- If you like the look of tiles for your bathroom, you can select an image from the mosaics range and we will format it to your bathroom size.
- Smooth Polyurethane Surface.
- Easy to Clean.
- No need for a waterproof membrane behind DecoSplash®. DecoSplash® splashback IS the waterproof membrane.

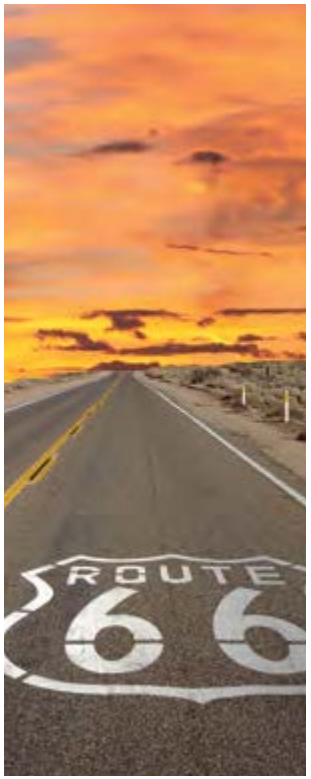
INSPIRATIONS

Make your splashback truly unique with your inspirations.
Choose your own images that reflect your personal style and interests, from travel snaps to your personal passion.

A family owned Australian business

AUSTRALIAN MADE

DecoSplash® process patent pending



SUPPLYING YOUR OWN IMAGES

To produce your DecoSplash®, it is ideal to supply images that are in the highest resolution (i.e. 10MB or more) and 300dpi (pixels). Call us to discuss whether the image you have selected fits the criteria.The DecoSplash® process can use images supplied in a range of formats such as Jpeg, Tiff, and Vector files.

FINDING YOUR OWN IMAGES

Instead of supplying your own personal photo you can find images on the internet, using image libraries such as Shutterstock, iStockphoto and CanStock Photo.
Use your search engine to access these photographic websites.

Once in a website type your key word, for example “cityscape” into the search bar and press search. Many images will appear.
For Shutterstock and iStockphoto, you can save images that you like to a “lightbox” for future reference or to review the shortlist of images you like.
In Canstock, you can save images to “favourites” for future reference or to review the shortlist of images you like.
Alternatively, note down the image number.

To open a “lightbox” or “favourites” for your selection of images, you may have to sign in by providing your email address.

ORIENTATION OF IMAGE

Some websites will allow you to refine your search so that the only images that appear are either horizontal, vertical or square. The best orientation for your splashback is horizontal, however in some instances other formats will work. For example in a bathroom a vertical image may be more suitable.

Alternatively, type in “panorama” along with your key word into the search bar, to bring up images in the most suitable format for splashback dimensions (horizontal or landscape orientation). For example, “panorama cityscape”

STYLE OF IMAGE

If you prefer images in a certain style, for example Black and White, Sepia, Vintage, Retro or Grunge, type that in to the search engine along with your keyword. For example “grunge cityscape”.

CLARITY OF IMAGE

Some websites allow you to view the image in a range of resolutions to determine whether clarity may be affected when the image is enlarged for your splashback. To produce your DecoSplash®, it is ideal to select images that are in the highest resolution (i.e. 10MB or more) and 300dpi (pixels). Call us to discuss whether the image you have selected fits the criteria.

The DecoSplash® process can use images supplied in a range of formats such as Jpeg, Tiff, and Vector files.
During the process of creating your splashback, we will take the image you have supplied and the dimensions of your splashback and communicate with you to ensure that you are happy with the look of your image in the scale and dimensions required.

PURCHASING YOUR IMAGE

Follow the prompts on the website for purchasing the image. Once you have purchased your image, place your order with your kitchen manufacturer and supply your image to them. They will order your splashback, and send through to the DecoSplash® team the image you have supplied. The DecoSplash® team will check your image and format it to your splashback dimensions.

Once completed your kitchen manufacturer will contact you to show you the proof of your custom image for you to approve prior to commencing production of your DecoSplash® splashback.

TERMINOLOGY

A Vector file is one that can be scaled to any size without loss of clarity. They are computer generated images that are suitable for DecoSplash® custom images.

A Jpeg file is the most common image format and is suitable for DecoSplash® custom images.

A Tiff file is a common image format used by graphic artists and photographers. This format is suitable for DecoSplash® custom images.

PAUL ARNOLD PHOTOGRAPHY

Think outside the square and even try a local photographer for your perfect custom splashback! For Example, in Darwin a popular local photographer Paul Arnold has sold a few of his beautiful local landscape photos to DecoSplash customers for use on their splashback. www.paularnold.com.au

ISLAND BACK IDEAS

INSPIRATIONS

1

Showcases the use of DecoSplash® Weathered Timber on both the splashback and the island back to compliment the earthy tones of this kitchen.

2

Shows just how creative you can be with DecoSplash®. Mix and match your kitchen splashback with your island back and even continue the image on to create a fantastic feature wall. Grey Forest and Bianco Brick from the Catalogue Range are featured in this kitchen.

3

Add a touch of class to your kitchen with matching splashback and island back. Cubed Greyscale featured in this kitchen.

4

Uses different DecoSplash® marble images to create an elegant kitchen. Don't be shy, try using different marbles that compliment each other. This kitchen features DecoSplash® Light Marble, and Dark Marble.

DecoSplash is not just limited to kitchen splashbacks, bathroom wet area linings and island backs. Think about your laundry, or your outdoor BBQ. DecoSplash® is an ideal product to liven up these spaces also.

1

This black and white themed laundry features DecoSplash® Beachstones from the H²0 Collection.

2

Adding a quirky flair, this laundry features a custom image splashback of… laundry!

3

This outdoor BBQ area features DecoSplash® Grunge Stone by Complete Kitchens in Victoria

4

Try something new. DecoSplash® Metal Mesh compliments this stainless steel outdoor barbeque.

SAME IMAGE - FOUR APPLICATIONS

DecoSplash® can be used in a variety of applications. Same image, different space.

Featured here is Weathered Parquetry from the NEW Timber Collection

Run with a theme using the same image throughout the different rooms in your home.

FUNDAMENTALS

Here's all you need to know about the technical information for DecoSplash® aluminium splashbacks, including how to install, FAQ's and other important information.

This section includes information such as:
DecoSplash® Kitchen Installation Guide
DecoSplash® Bathroom Installation Guide
DecoSplash® FAQ's
DecoSplash® Compliance

Don't be afraid to try something new. DecoSplash® aluminium splashbacks are not limited to just kitchen and bathroom applications. DecoSplash® aluminium splashbacks can also be used as a feature wall, for wardrobe doors, inserts and more.

A family owned Australian business

AUSTRALIAN MADE

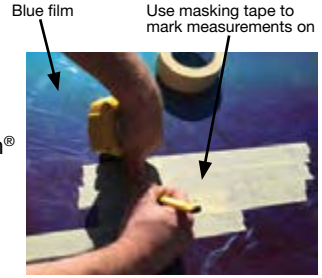
DecoSplash® process patent pending

DECOSPLASH® INSTALLATION GUIDE KITCHEN

DecoSplash® is supplied with a protective plastic sheet. It is recommended to leave the protective sheet on while the splashback is being installed.

STEP 1: WALL PREPARATION
Ensure that the surface of the wall is sound, properly sealed and free of dust and dirt, flat and suitable for fixing DecoSplash® splashback.

STEP 2: MEASURING
Sizes must be measured to the nearest millimetre.



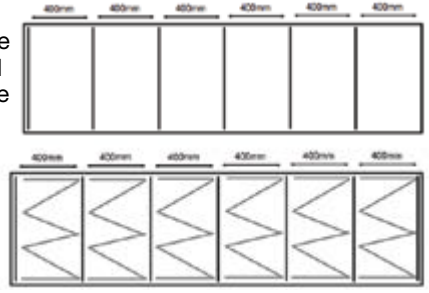
STEP 3: MARKING OUT
After measuring your wall for installation, your DecoSplash® panel should be placed on a flat, clean and level surface. Use a tape measure and pencil to mark and measure the splashback panel to match the wall dimensions.

STEP 4: CUTTING
Use a circular saw with an aluminium blade for long cuts, and cut with the circular saw on the back of the splashback. Use a jig saw with a metal cutting blade for detailed cut outs such as power points and taps.

STEP 5: TEST FIT
Before applying any adhesives, complete a test fit of the splashback to ensure that it fits correctly. Trim the protective film edges so that the film is only attached to the face of the splashback.

STEP 6: EDGE FINISHING
All cut edges can be filed by gently using a fine, single cut file.

STEP 7: APPLYING TAPE
3M urethane coated double sided tape is available for purchase with DecoSplash®. The double sided tape is used for adhesion while the liquid adhesive cures. The tape supplied is 3.2mm thick to assist with benchtop tolerances. Apply the tape vertically along the cut panel approximately every 400mm.



STEP 8: APPLYING ADHESIVE
Apply a 6mm bead of high strength, water resistant construction adhesive or silicone in a wavy pattern or in circles, between each tape strip.

STEP 9: PANEL SEALANT
Seal where the splashback meets other surfaces eg. benchtops or internal corners, with translucent wet area silicone.

STEP 10: PANEL CLEAN UP
After the splashback is fitted and the adhesive is cured, remove the outer protective film or masking tape in one continuous movement to achieve the best finish. A warm water detergent can be used to wipe down finished panels to remove excess silicone before it dries.

DECOSPLASH® INSTALLATION GUIDE BATHROOM

STEP 1: WALL PREPARATION
Ensure that the surface of the wall is sound, water proofing has been completed to seal shower hob and the wall is free of dust and dirt, flat and suitable for fixing DecoSplash® as a Bathroom Wall lining.

STEP 2: MEASURING
Ensure that you take accurate measurements of the walls you will be installing DecoSplash® onto.

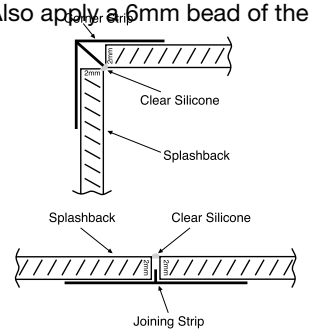
STEP 3: MARKING OUT
After measuring your wall for installation, your DecoSplash® panel should be placed on a flat, clean and level surface. Use a tape measure and pencil to mark and measure the wall for your bathroom wall lining.

STEP 4: CUTTING
Double check all measurements before starting to cut the panel. If cutting for your project is required, for long cuts use a panel saw and for more detailed cut-outs (eg. for tapware, showerheads etc) use a jigsaw. Otherwise we can supply your panels cut to size.

STEP 5: TEST FIT
Before applying any adhesives, complete a test fit of the wall lining to ensure that it fits correctly. Trim the protective film edges so that the film is only attached to the face of the splashback.

STEP 6: EDGE FINISHING
All cut edges can be filed using a fine, single-cut file.

STEP 7: APPLYING ADHESIVE
Apply a 6mm bead of high strength, water resistant silicone adhesive to create 40mm diameter circles of adhesive along the full length and width of the panel. Also apply a 6mm bead of the adhesive around the perimeter of the panel.



STEP 8: JOINING PANELS
To join DecoSplash® panels joining strips are available for corner joints and wall joints as per visual:

STEP 9: PANEL SEALANT
Seal the DecoSplash® panel where the panel meets other surfaces eg. shower recesses, bathroom vanities, internal corners, with translucent wet area silicone.

STEP 10: PANEL CLEAN UP
After the splashback is fitted and the adhesive is cured, remove the outer protective film or masking tape in one continuous movement to achieve the best finish. A warm water detergent can be used to wipe down finished panels to remove excess silicone before it dries.

DECOSPLASH® FAQs

WHAT IS DECOSPLASH® MADE OF?

DecoSplash® is a solid metal (2mm aluminium) splashback, which is coated with a durable polyurethane powder coating.
The DecoSplash® product is made using a process called sublimation. The durable polyurathane powder coating is first applied to the aluminium and then photographic images are sublimated into the powder coating layer.
DecoSplash® process patent pending.

IS DECOSPLASH® DURABLE AND EASY TO CLEAN?

The DecoSplash® polyurethane powder coating is very durable and easy to clean. The best way to think about DecoSplash® is that it is like a non-stick frypan. It is robust and you only need to wipe it over with a damp cloth or a mild detergent to clean and unlike glass, it does not leave streaks.

WHAT HAPPENS IF I SCRATCH IT?

The design or image penetrates the full depth of the powder coating, so a surface scratch can simply be polished out as you would do with a scratch on your car.

CAN I USE DECOSPLASH® BEHIND A GAS COOKTOP?

Yes. DecoSplash® is made of solid aluminium which is a non-combustible material. The finish is baked on in an oven and is unaffected by heat used in cooking. Aluminium is a very good conductor of heat, which means that any heat generated from cooking will be quickly and evenly dissipated over the whole surface area of the splashback, and the splashback will remain cool.

DO I NEED TO USE A FIRE RETARDANT MATERIAL BEHIND THE SPLASHBACK?

Glass is a poor conductor of heat so heat builds up behind a cooktop, and therefore a non-combustible fibre cement sheet is required behind a glass splashback. Because aluminium is a very good conductor of heat and is non-combustible, a fibre cement sheet is not required behind DecoSplash®, although it is normal to line kitchen walls with a fire retardant grade of 10mm plasterboard.

CAN I USE DECOSPLASH® IN AN OUTDOOR KITCHEN?

Yes, DecoSplash® is ideal for outdoor kitchens. It is unaffected by the weather and is UV stable.

HOW IS DECOSPLASH® INSTALLED?

DecoSplash® is easy to install and is fixed to the wall using silicone or a construction adhesive and/or double sided tape.
DecoSplash® can be installed onto plasterboard, fibre cement sheeting and in the case of bathrooms, it can be installed directly into studs.

WHAT ABOUT HOLES FOR POWER POINTS OR TAPS?

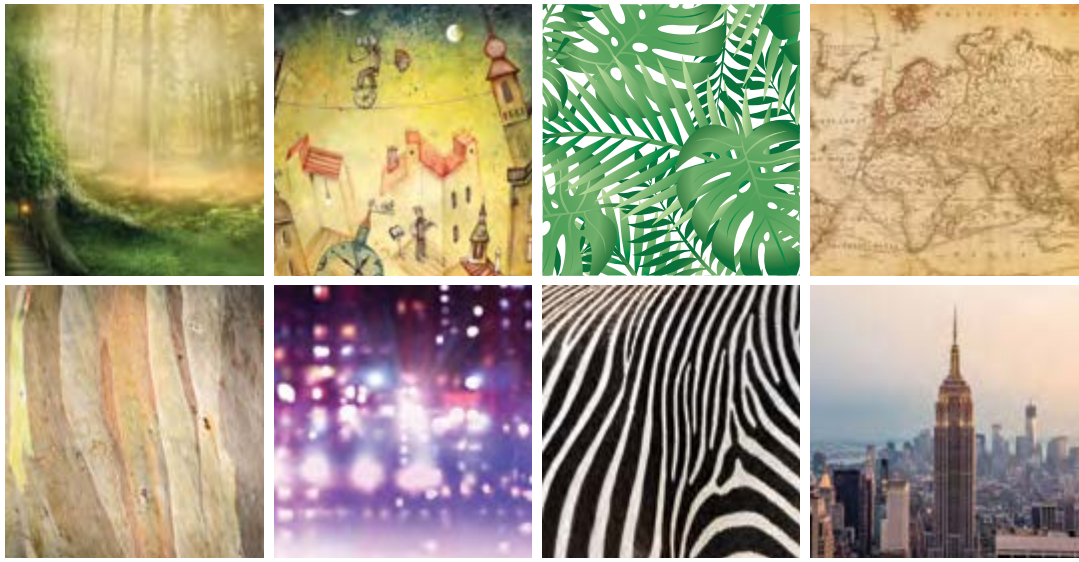
Aluminium sheet is easy to work with, and holes can be cut on site using standard tools. DecoSplash® can also be cut or trimmed using standard tools.

HOW ARE EDGES OR CORNERS FINISHED?

Edges and corners can be finished using silicone, and a black edge strip is also available.

DOES DECOSPLASH® HAVE A WARRANTY?

Yes, DecoSplash® comes with a 10 year warranty in accordance with Australian Standards AS3715 and Qualicoat.



STANDARDS COMPLIANCE

DecoSplash® fully complies with all of the relevant Australian and International Standards for Splashbacks.

1) POWDER COATED SURFACE.

Qualicoat is the international standard for quality assurance in powder coating, and Qualicoat sets out different levels of durability for powder coating. The DecoSplash® powder coated surface is applied by licensed Qualicoat applicators and complies with Class 2 “Super Durable” requirements, which is 50% more durable than standard powder coating. In addition, DecoSplash® fully complies with the requirements of the Australian Standard for powder coating, AS 3715.

2) AUSTRALIAN CONSTRUCTION CODE (BCA)

The BCA sets out requirements for non-combustible materials that are used in building construction. DecoSplash® has been tested at the CSIRO Building Research Station to AS 1530.3 and complies with the BCA requirements as a “non-combustible” material.

3) GAS REGULATIONS.

When gas cooktops are used, splashbacks must comply with the Australian Standard for the installation of gas appliances, which is the Gas Regulations AS 5601.1. This standard sets out the requirements for Fire Resistant Materials and the requirements for the protection of combustible surfaces. DecoSplash® fully complies with the requirements of AS 5601.1 as a Fire Resistant Material, however it is recommended that gas cooktops are installed with a minimum distance of 200mm from the splashback to the back gas hob.
All types of electric cooktops can be installed with DecoSplash®, and a minimum distance of 100 mm from the splashback is recommended.

4) POWER POINTS.

Power points sold in Australia by major Australian suppliers are designed for installation with metal in accordance with the Electrical Standard AS 3000. However, the installation MUST be carried out by a licensed electrical contractor in every case. Power points are designed to be electrically isolated from the metal surface, however, as an additional safety measure, an earth wire can be fitted to the splashback as shown in the adjacent photo. The fitting of the optional earth wire is recommended.
